For Immediate Release

## ***maxon launches New Products***

*Our drive portfolio will be expanded in April 2015*

**At the Hannover Messe in Germany, maxon motor will be releasing a multitude of new products.**

The maxon X drives family will be expanded featuring new sizes of dc brushed motors and gearheads. These high efficiency drives are configurable online and ready to ship-in 11 working days.

In terms of motor size, one new motor stands out: The EC4 is a brushless DC motor with a diameter of only 4 millimeters. It is especially suited for applications in medical technology, and can be combined with a matching gearhead.

For customers who need higher torques, maxon will also be launching the new brushless EC-i40 high torque micromotor with several power ranges available.

### **New 2015/16 product catalog**

The new German version of the 2015/2016 product catalog will be available at the Hannover Messe. We will also be making the e-Paper catalog available online for your convenience at [www.maxonmotor.ch](http://www.maxonmotor.ch)

Visit us at the Hannover Messe: **Hall 15, Booth D 05** to see the latest in drive technology from maxon motor.
